Paper 2 Theory

May/June 2023

MARK SCHEME

Maximum Mark: 100

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2023 series for most Cambridge IGCSE, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

This document consists of **12** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Science-Specific Marking Principles

1	Examiners should consider the context and scientific use of any keywords when awarding marks. Although keywords may be present, marks should not be awarded if the keywords are used incorrectly.
2	The examiner should not choose between contradictory statements given in the same question part, and credit should not be awarded for any correct statement that is contradicted within the same question part. Wrong science that is irrelevant to the question should be ignored.
3	Although spellings do not have to be correct, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. ethane / ethene, glucagon / glycogen, refraction / reflection).
4	The error carried forward (ecf) principle should be applied, where appropriate. If an incorrect answer is subsequently used in a scientifically correct way, the candidate should be awarded these subsequent marking points. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.
5	<p><u>'List rule' guidance</u></p> <p>For questions that require <i>n</i> responses (e.g. State two reasons ...):</p> <ul style="list-style-type: none">• The response should be read as continuous prose, even when numbered answer spaces are provided.• Any response marked <i>ignore</i> in the mark scheme should not count towards <i>n</i>.• Incorrect responses should not be awarded credit but will still count towards <i>n</i>.• Read the entire response to check for any responses that contradict those that would otherwise be credited. Credit should not be awarded for any responses that are contradicted within the rest of the response. Where two responses contradict one another, this should be treated as a single incorrect response.• Non-contradictory responses after the first <i>n</i> responses may be ignored even if they include incorrect science.

6 Calculation specific guidance

Correct answers to calculations should be given full credit even if there is no working or incorrect working, **unless** the question states 'show your working'.

For questions in which the number of significant figures required is not stated, credit should be awarded for correct answers when rounded by the examiner to the number of significant figures given in the mark scheme. This may not apply to measured values.

For answers given in standard form (e.g. $a \times 10^n$) in which the convention of restricting the value of the coefficient (a) to a value between 1 and 10 is not followed, credit may still be awarded if the answer can be converted to the answer given in the mark scheme.

Unless a separate mark is given for a unit, a missing or incorrect unit will normally mean that the final calculation mark is not awarded. Exceptions to this general principle will be noted in the mark scheme.

7 Guidance for chemical equations

Multiples / fractions of coefficients used in chemical equations are acceptable unless stated otherwise in the mark scheme.

State symbols given in an equation should be ignored unless asked for in the question or stated otherwise in the mark scheme.

Question	Answer	Marks
1(a)	force per unit mass ;	1
1(b)	mass \times g or 2.5×1.6 ; 4.0 (N) ;	2
1(c)(i)	$1.6 \text{ m} / \text{s}^2$;	1
1(c)(ii)	force / gravitational pull is acting / unbalanced force ;	1

Question	Answer	Marks
2	W: cuticle ; X: upper epidermis cell ; Y: palisade mesophyll cell ; Z: spongy mesophyll cell ;	4

Question	Answer	Marks
3(a)(i)	151 ;	1
3(a)(ii)	2.4 ; 11.9 ;	2
3(b)	toxic / poisonous ;	1

Question	Answer	Marks
4(a)	(volume =) 0.006 (m ³) ; (ρ =) $m \div v$ or $7.5 \div v$; 1250 ; kg / m ³ ;	4
4(b)	4.0 (cm) ;	1

Question	Answer	Marks
5	exothermic ; saturated ; reduction ; water ;	4

Question	Answer	Marks								
6(a)	<i>any two from:</i> more males than females use electronic cigarettes ORA ; use of e-cigarettes in males increased until e.g. 2018 use of e-cigarettes in males decreased after 2018 ; use of e-cigarettes in males increased then decreased ; use of e-cigarettes in females increased ;	2								
6(b)	<table border="1"> <thead> <tr> <th>component</th> <th>harmful effect</th> </tr> </thead> <tbody> <tr> <td>nicotine ;</td> <td>Increase in heart rate</td> </tr> <tr> <td>tar</td> <td>(lung) cancer ;</td> </tr> <tr> <td>carbon monoxide / CO ;</td> <td>toxic</td> </tr> </tbody> </table>	component	harmful effect	nicotine ;	Increase in heart rate	tar	(lung) cancer ;	carbon monoxide / CO ;	toxic	3
component	harmful effect									
nicotine ;	Increase in heart rate									
tar	(lung) cancer ;									
carbon monoxide / CO ;	toxic									

Question	Answer	Marks
6(c)	(nicotine is) addictive ;	1

Question	Answer	Marks
7(a)	(advantage) renewable or does not produce greenhouse gases ; (disadvantage) not available at night / not always available (e.g. when cloud cover) / not reliable / removes land from agricultural use ;	2
7(b)	wind / wave / geothermal / hydroelectric / tidal / nuclear ;	1
7(c)	more radiation is absorbed ; black is a good absorber (of radiation) ; water is heated faster ;	2

Question	Answer	Marks
8(a)	protein ; amylase / maltase / lipase / protease ; gene ;	3
8(b)	protrusion drawn to fit the shape of the active site (approximately) ;	1
8(c)	enzyme / protein / active site denatured ; enzyme and substrate no longer fit / not complimentary / no formation of enzyme-substrate complex ;	2

Question	Answer	Marks
9(a)(i)	17 to 19 inclusive ;	1
9(a)(ii)	fuel oil ;	1
9(a)(iii)	jet or aircraft fuel ;	1
9(b)	$ \begin{array}{ccccccc} & \text{H} & & \text{H} & & \text{H} & \\ & & & & & & \\ \text{H} & - \text{C} & - & \text{C} & - & \text{C} & - \text{H} \\ & & & & & & \\ & \text{H} & & \text{H} & & \text{H} & ; \end{array} $	1
9(c)	more demand for smaller alkanes or less demand for large hydrocarbons or to make hydrogen or to make alkenes;	1

Question	Answer	Marks
10	meiosis ; female gamete ; diploid ; uterus ;	4

Question	Answer	Marks
11(a)(i)	longitudinal ;	1
11(a)(ii)	a horizontal line with the arrowheads at identical consecutive points on the wave ;	1
11(b)(i)	reflected ray at same angle from normal as incident ray ;	1
11(b)(ii)	security marking / sterilising (water) ;	1

Question	Answer	Marks
12(a)	29 ; 35 ;	2
12(b)	Any two from: ductile ; malleable ; (good) conductor (of electricity) ;	2
12(c)(i)	iron sulfate ;	1
12(c)(ii)	iron more readily forms positive ions ;	1
12(c)(iii)	increase temperature or increase surface area (of iron) or increase concentration (of copper sulfate) ;	1

Question	Answer	Marks
13(a)	(R=) V / I (in any form) or 34 seen ; (R =) $2 \div 34 \times 10^{-3}$ or $2 \div 0.034$ or 58.8 ; 59 ;	3
13(b)	(E =) $V I t$ (in any form) or 600 s or $2 \times 34 \times 600$; ($2.0 \times .034 \times 600 =$) 41 (J) ;	2

Question	Answer	Marks
14	<p>Anaerobic respiration</p>  <p>...</p>	3

Question	Answer	Marks
15(a)	balanced equation ; correct state symbols with correct formulae ; $2 \text{Li (s)} + \text{F}_2 \text{(g)} \rightarrow 2 \text{LiF (s)}$	2
15(b)	2, 8 electron configuration ; negative charge ;	2
15(c)	flame test ; red flame ;	2

Question	Answer	Marks
16	Any three from: reference to absorber ; idea of covering source (with absorber) or placing absorber between source and detector ; before and after count reading ; correct change in count reading for gamma e.g. large for lead, small for paper ; large change in for alpha / beta ; AVP ;	3

Question	Answer	Marks
17	 <p>conducts nerve impulses</p> <p>physical digestion</p> <p>pumps blood</p> <p>carbon dioxide passes out</p> <p>alveoli</p> <p>heart</p> <p>liver</p> <p>mouth</p> <p>spinal cord</p>	4
