4. Bad publicity

To increase market share and profit some businesses may engage in unfair practices at the expense of the consumer. Unwanted PPI, the Volkswagen emissions scandal and the horsemeat food scandal are examples of these and illustrate the need to provide protection for the consumer against such practices.

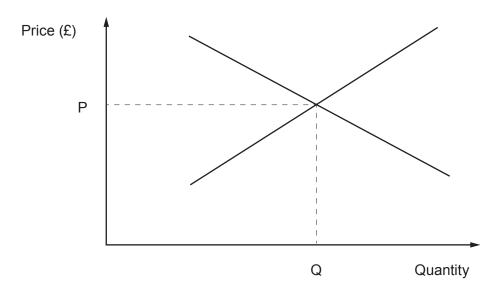

South Korean tech giant Samsung has permanently stopped production of its high-end Galaxy Note 7 smartphone after reports of handsets that it had declared to be safe had caught fire. The company said, "For the benefit of consumers' safety, we stopped sales and exchanges of the Galaxy Note 7 and have consequently decided to stop production."

"Samsung could suffer a considerable loss of consumer faith," said Greg Roh, a market expert. He added, "The reason consumers prefer brands like Samsung and Apple is because of product reliability. So, in this case, brand damage is inevitable and it will be costly for Samsung to turn that around again."
