INSTRUCTIONS TO CANDIDATES

Answer **all** questions.

Use black ink or black ball-point pen.

Write your name, centre number and candidate number in the spaces at the top of this page.

Write your answers in the spaces provided in this booklet.

If additional space is required you should use the continuation page at the back of this booklet. The question number(s) should be clearly shown.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part-question; you are advised to divide your time accordingly.

This paper requires that you make as full use as possible of appropriate examples and reference to data to support your answer. Sketch maps and diagrams should be included where relevant.

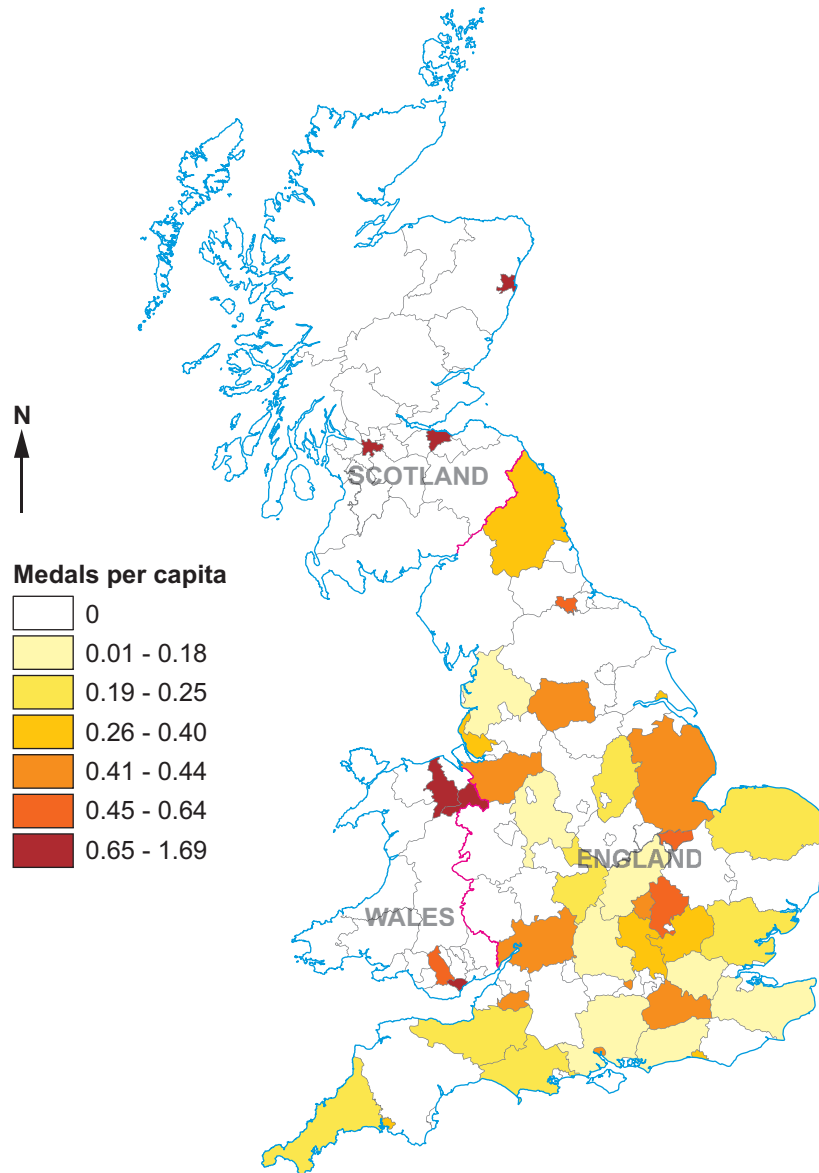

A plain page is available at the end of each section for you to add any relevant sketch maps and diagrams you may wish to include. The question number(s) should be clearly shown.

Section A: Changing Places

Answer all questions.

Make the fullest possible use of examples and data to support your answers.

Figure 1: Medals by GB athlete's place of birth (2012 Olympics)

Source: www.cartonerd.blogspot.co.uk

1. (a) Use **Figure 1** to describe the distribution of medals by GB athlete's place of birth. [4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

(b) Outline **one** locational factor encouraging knowledge economy cluster growth in places in the UK. [3]

.....

.....

.....

.....

.....

.....

.....

Figure 2: Percentage employment in manufacturing in 10 of Sheffield’s inner city electoral wards, 2011

	Electoral Ward	% employment in manufacturing
1	Arbourthorne	10.4
2	Broomhill	3.3
3	Burngreave	10.4
4	Central	5.4
5	Darnall	12.7
6	Gleadless Valley	8.8
7	Manor Castle	11.0
8	Nether Edge	5.4
9	Richmond	11.7
10	Walkley	7.1

Source: www.sheffield.gov.uk

2. (a) (i) Use **Figure 2** to calculate the mean for the percentage employment in manufacturing. Show your working. [2]

Mean value:

- (ii) Identify **one** strength and **one** weakness of the mean as a measure of central tendency for this set of data. [2]

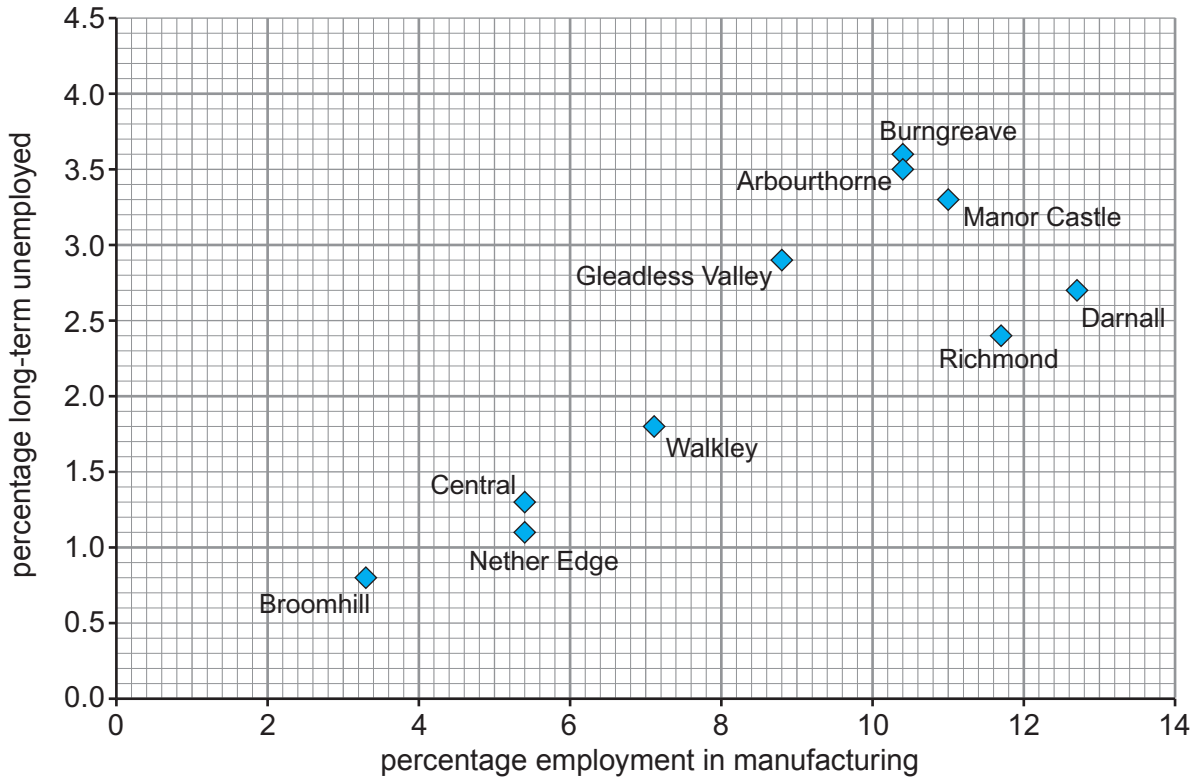

.....

.....

.....

Figure 3: Scattergraph showing percentage employment in manufacturing and percentage long-term unemployed in 10 of Sheffield's 28 electoral wards

B110U201
07

(iii) Plot and label the data for the electoral wards of Hillsborough and Southey on **Figure 3**. [2]

Electoral Ward	% employment in manufacturing	% long-term unemployed
Hillsborough	9.4	1.8
Southey	12.8	4.0

(iv) Explain why a scattergraph is a suitable presentation technique for these data. [2]

Section B: Fieldwork Investigation in Physical and Human Geography

Answer all questions.

*In your answers to Section B you should include evidence from **your** fieldwork investigations in physical geography and human geography.*

Figure 4: Direction of gusts of wind observed at Polzeath Beach, Cornwall, over a 2 hour period, March 2016

N	NNE	NE	ENE	E	ESE	SE	SSE	S	SSW	SW	WSW	W	WNW	NW	NNW
0	1	0	0	1	1	0	0	2	1	3	6	4	2	1	1

3. (a) (i) Suggest an appropriate graphical technique that could be used to present the data in **Figure 4**. [1]

Graphical technique:

.....

- (ii) Justify your choice in (a)(i). [2]

.....

.....

.....

.....

A group of A level geography students undertook a fieldwork investigation of tourist villages in Cornwall.

- (b) The students carried out a risk assessment before collecting their data. Suggest the likely characteristics of this risk assessment process. [5]

.....

.....

.....

.....

.....

.....

.....

.....

.....

In small groups they investigated 12 villages. Their hypothesis was 'Cornish villages do not provide for the local population'. The students conducted traffic counts and recorded the number of tourist shops.

Figure 5: Field data, June 2016

Cornish village	Traffic count 10:00 – 10:15 (total vehicles)	Traffic count 15:15 – 15:30 (total vehicles)	Tourist shops	Total shops
Widemouth Bay	1	2	4	6
Trebarwith	3	1	3	3
Polzeath	8	5	9	9
Rock	4	7	10	13
Mother Ivey's Bay	1	1	1	2
Treyarnon Bay	2	3	5	5
Trenance	7	4	4	6
Watergate Bay	27	23	2	2
Holywell Bay	3	2	3	6
Perran Bay	3	5	2	3
Porthtowan	4	3	2	2
Gwithian	6	9	4	5

- (c) (i) Identify **one** statistical technique that could be used to investigate a correlation between traffic count data and number of tourist shops in **Figure 5**. [1]

Statistical technique:

- (ii) Justify your choice in (c)(i). [3]

.....

.....

.....

.....

.....

.....

.....

.....

(d) Suggest **two** other sources of data and/or information that the students could use to investigate the hypothesis further. [8]
