AS Level

Mark Scheme for June 2025

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2025

MARKING INSTRUCTIONS**PREPARATION FOR MARKING
RM ASSESSOR**

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: *RM Assessor Online Training: OCR Essential Guide to Marking*.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are available in RM Assessor
3. Log-in to RM Assessor and mark the **required number** of practice responses (“scripts”) and the **required number** of standardisation responses.

MARKING

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the RM Assessor 50% and 100% (traditional 40% Batch 1 and 100% Batch 2) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone or the RM Assessor messaging system, or by email.
5. **Crossed Out Responses**
Where a candidate has crossed out a response and provided a clear alternative then the crossed out response is not marked. Where no alternative response has been provided, examiners may give candidates the benefit of the doubt and mark the crossed out response where legible.

Rubric Error Responses – Optional Questions

Where candidates have a choice of question across a whole paper or a whole section and have provided more answers than required, then all responses are marked and the highest mark allowable within the rubric is given. Enter a mark for each question answered into RM assessor, which will select the highest mark from those awarded. (*The underlying assumption is that the candidate has penalised themselves by attempting more questions than necessary in the time allowed.*)

Multiple Choice Question Responses

When a multiple choice question has only a single, correct response and a candidate provides two responses (even if one of these responses is correct), then no mark should be awarded (as it is not possible to determine which was the first response selected by the candidate).

When a question requires candidates to select more than one option/multiple options, then local marking arrangements need to ensure consistency of approach.

Contradictory Responses

When a candidate provides contradictory responses, then no mark should be awarded, even if one of the answers is correct.

Short Answer Questions (requiring only a list by way of a response, usually worth only **one mark per response**)

Where candidates are required to provide a set number of short answer responses then only the set number of responses should be marked. The response space should be marked from left to right on each line and then line by line until the required number of responses have been considered. The remaining responses should not then be marked. Examiners will have to apply judgement as to whether a 'second response' on a line is a development of the 'first response', rather than a separate, discrete response. *(The underlying assumption is that the candidate is attempting to hedge their bets and therefore getting undue benefit rather than engaging with the question and giving the most relevant/correct responses.)*

Short Answer Questions (requiring a more developed response, worth **two or more marks**)

If the candidates are required to provide a description of, say, three items or factors and four items or factors are provided, then mark on a similar basis – that is downwards (as it is unlikely in this situation that a candidate will provide more than one response in each section of the response space.)

Longer Answer Questions (requiring a developed response)

Where candidates have provided two (or more) responses to a medium or high tariff question which only required a single (developed) response and not crossed out the first response, then only the first response should be marked. Examiners will need to apply professional judgement as to whether the second (or a subsequent) response is a 'new start' or simply a poorly expressed continuation of the first response.

6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there, then add a tick to confirm that the work has been seen.

7. There is a NR (**No Response**) option. Award NR (No Response):
- if there is nothing written at all in the answer space
 - OR if there is a comment which does not in any way relate to the question (e.g., 'can't do', 'don't know')
 - OR if there is a mark (e.g., a dash, a question mark) which is not an attempt at the question.
- Note: Award 0 marks – for an attempt that earns no credit (including copying out the question).
8. The RM Assessor **comments box** is used by your team leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. **Do not use the comments box for any other reason.**
If you have any questions or comments for your team leader, use the phone, the RM Assessor messaging system, or e-mail.
9. Assistant Examiners will send a brief report on the performance of candidates to their Team Leader (Supervisor) via email by the end of the marking period. The report should contain notes on particular strengths displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.
10. For answers marked by levels of response:
- a. **To determine the level** – start at the highest level and work down until you reach the level that matches the answer
 - b. **To determine the mark within the level**, consider the following:

Descriptor	Award mark
On the borderline of this level and the one below	At bottom of level
Just enough achievement on balance for this level	Above bottom and either below middle or at middle of level (depending on number of marks available)
Meets the criteria but with some slight inconsistency	Above middle and either below top of level or at middle of level (depending on number of marks available)
Consistently meets the criteria for this level	At top of level

Annotation	Meaning
	Blank Page – this annotation must be used on all blank pages within an answer booklet (structured or unstructured) and on each page of an additional object where there is no candidate response.
	Tick
	Cross
	Confused (replaces the question mark)
	Benefit of doubt
	AO1 – Knowledge and understanding
	AO2 – Apply knowledge and understanding
	AO3 - Analyse
	AO4 - Evaluation
	Omission
	Not answered question
	Noted but no credit given
	Too vague
	Own figure rule

Annotation	Meaning
REP	Repetition

Annotation	Meaning
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

SECTION A

Question	Answer	Marks	Guidance
1	B	1	
2	A	1	
3	B	1	
4		1	There was an error in this question which affected the candidate's ability to answer it. To make sure all candidates were treated fairly, we have awarded full marks.
5	C	1	
6	C	1	
7	C	1	
8		1	There was an error in this question which affected the candidate's ability to answer it. To make sure all candidates were treated fairly, we have awarded full marks.
9	C	1	
10	D	1	
11	C	1	
12	C	1	
13	A, C	1	There was an issue with this question where two of the answers are correct. To make sure all candidates were treated fairly, we have awarded full marks to both answers.
14	B	1	
15	A	1	
16	C	1	

Question	Answer	Marks	Guidance
17	A	1	
18	D	1	
19	C	1	
20	D	1	
	Total	20	

SECTION B

Question			Grid	Answer	Mark	Rationale/Additional Guidance
21	(a)			$F_{\text{horizontal}} (= F \times \cos\theta) = 420 \times \cos 53^\circ$	1	ALLOW 253
				$= 250 \text{ (N)}$	1	
21	(b)			$W (= F \times d) = 253 \times 50$	1	ALLOW ECF from (a)
				$= 13000 \text{ (12650)}$	1	ALLOW 12500
				J	1	Standalone unit mark ALLOW lower case j, clear misspellings of joule ALLOW $\text{kg m}^2 \text{ s}^{-2}$
				Total	5	

Question			Grid	Answer	Mark	Rationale/Additional Guidance
22	(a)			Sum / difference of I_2 and I_3	1	Correct answer scores both marks
				$(I_1 =) I_2 - I_3$	1	
22	(b)			Current is (rate of) flow of charge	1	ALLOW Idea that current is movement of charge
				Current entering junction equals current leaving junction / charge cannot be created or destroyed /	1	ALLOW Idea that “change going in equals charge coming out” IGNORE use of word “conservation” in response
				Total	4	

Question			Grid	Answer	Mark	Rationale/Additional Guidance
23	(a)			$1/u = 0$ or u is infinite/very large AND $v = 35$ (cm) $P = 1/f = 1/0.35$ $P = (+) 2.9$ D	1 1 1	Can be seen in calculation Must be to at least 2sf Lens formula must be used for any credit in this question
23	(b)			 Plane wavefronts to the left of the lens Correct and constant curvature to the right of the lens (as shown) Approximately equally spaced on both sides	1 1 1	Expect at least three wavefront on either side of the lens ALLOW correct <u>slight</u> curvature on wavefronts to the left of the lens provided curvature is correct and clearly <u>significantly</u> greater on the right IGNORE length of wavefronts Equal spacing of <u>all</u> wavefronts drawn, by eye
Total					6	

Question		Grid	Answer	Mark	Rationale/Additional Guidance
24	(a)		Class of material Metal Semiconductor Insulator Mobile charge carriers per m³ 10¹⁶ 10²⁸ ~ 0	2	All correct = 2 marks One correct = 1 mark
24	(b)		0.28 – 0.32 (nm)	1	
24	(c)		Volume of 1 atom = (length)³ = eg (0.30nm)³ = 2.7 x 10⁻²⁹ m³ Number density = (1 / 2.7 x 10⁻²⁹) / 20 = 3.7 x 10²⁸ / 20 m⁻³ = 1.9 x 10²⁷ m⁻³	1 1	ALLOW ECF from (b) ALLOW POT error at this point Expect between 2.3 x 10²⁷ and 1.5 x 10²⁷ if (b) correct ALLOW slight variation for rounding differences
Total				5	

Question			Grid	Answer	Mark	Guidance
25	(a)			Refraction / Diffraction / Interference / Dispersion / Polarisation	1	DO NOT ALLOW reflection ALLOW reference to experiments e.g. Young's slits or description of diffraction patterns.
25	(b)			No photons emitted until voltage across it / energy provided is above a certain amount (Once above the threshold) increasing the current increases brightness / does not change frequency/energy/colour OR same photon energy / single wavelength emitted (above threshold)	1 1	ALLOW the idea of a threshold voltage ALLOW concept of a single colour
25	(c)	(i)		(photon energy =) 3.86 (frequency =) 5.96	1 1	Allow 3.85 (assume value of the calculated Planck constant used)
25	(c)	(ii)		Mean = $(6.03 + 7.16 + 6.76 + 6.10) / 4$ $= 6.51 \times 10^{-34} \text{ Js}$	1 1	Correct answer to 3sf only
25	(d)			Range of values within uncertainty is $6.18 - 6.84 \times 10^{-34}$ (Accepted value is 6.63×10^{-34}) and is in this range) so it is consistent	1 1	ALLOW maximum value only to be calculated $(6.51 + 5\%) = 6.84$ ALLOW complete correct response with conclusion for incorrect value from (c)

Question			Grid	Answer	Mark	Guidance
						Alternative approach: Calculation of percentage difference between calculated and true value $(6.63 - 6.51)/6.63 \times 100 = 1.8 \%$ So it is consistent ALLOW correct conclusion drawn from ecf on (c)(ii)
				Total	9	

Question			Grid	Answer	Mark	Guidance
26	(a)			Can be processed by computer / can be sent over a digital network such as internet / can apply error correction techniques (to improve quality at receiver) / takes up less storage / easier to compress	1	ALLOW acceptable alternatives
26	(b)	(i)		Maximum displacement (from equilibrium/position of no vibration)	1	
26	(b)	(ii)		$n = \log_2 1024$ $= 10$ (bits)	1 1	
26	(c)			minimum rate of sampling ($> 2 \times$ maximum frequency of signal) $\geq 2 \times 2$ (kHz) $= 4000$ (s^{-1})	1 1	
26	(d)			Bandwidth per sensor = $(15 + 9)$ bits $\times$ 8000 samples/s $= 192$ kb/s $48M / 192k = 250$	1 1	ALLOW single mark for $48M / 120k = 400$ (for not using error correction)
26	(e)			Computer won't get tired / computer can work faster / It can process much more data in a short time interval / It can compare a much greater range of data as memory capacity much greater / more reliable	1	ALLOW plausible alternatives
				Total	9	

Question		Grid	Answer	Mark	Guidance
27	(a)		Speed of light in vacuum	1	DO NOT ALLOW formula in symbols unless defined ALLOW correct formulations described with 'ratio' or 'proportion'
			divided by speed of light in medium	1	
27	(b)		Points plotted correctly	1	Within ½ small square
27	(c)		Line of best fit and gradient triangle drawn (or implied by readings)	1	Gradient triangle can be implied by pair of readings
			Correct reading of pairs of points (on gradient triangle) with triangle at least 8cm x 8cm	1	Read to within ½ small square – do not allow points from table unless line goes through that point
			1.46-1.50	1	Must be to at least 3sf. No credit for answer with no working
27	(d)		Any two from: rays not narrow enough / rays too faint / normal difficult to place / protractor only reads to 1 degree / position of the block may shift during the experiment /	2	ALLOW other reasonable suggestions DO NOT ALLOW "human error"
27	(e)		Accuracy is how close the result is to the true value	1	
			Student A is <u>correct</u> as their value can be compared to the book value	1	
			Student B is <u>incorrect</u> as their description is about precision / consistent	1	
			Student B may have the wrong gradient (despite points being close to the line)	1	

Question			Grid	Answer	Mark	Guidance
				Total	12	
				Total Section C	30	
				Total Sections B & C	50	

Need to get in touch?

If you ever have any questions about OCR qualifications or services (including administration, logistics and teaching) please feel free to get in touch with our customer support centre.

CAMBRIDGE
UNIVERSITY PRESS & ASSESSMENT

OCR is part of Cambridge University Press & Assessment, a department of the University of Cambridge.

For staff training purposes and as part of our quality assurance programme your call may be recorded or monitored. © OCR 2025 Oxford Cambridge and RSA Examinations is a Company Limited by Guarantee. Registered in England. Registered office The Triangle Building, Shaftesbury Road, Cambridge, CB2 8EA.

Registered company number 3484466. OCR is an exempt charity.

OCR operates academic and vocational qualifications regulated by Ofqual, Qualifications Wales and CCEA as listed in their qualifications registers including A Levels, GCSEs, Cambridge Technicals and Cambridge Nationals.

OCR provides resources to help you deliver our qualifications. These resources do not represent any particular teaching method we expect you to use. We update our resources regularly and aim to make sure content is accurate but please check the OCR website so that you have the most up-to-date version. OCR cannot be held responsible for any errors or omissions in these resources.

Though we make every effort to check our resources, there may be contradictions between published support and the specification, so it is important that you always use information in the latest specification. We indicate any specification changes within the document itself, change the version number and provide a summary of the changes. If you do notice a discrepancy between the specification and a resource, please [contact us](#).

Whether you already offer OCR qualifications, are new to OCR or are thinking about switching, you can request more information using our [Expression of Interest form](#).

Please [get in touch](#) if you want to discuss the accessibility of resources we offer to support you in delivering our qualifications.
